

Technology simplified, infinite possibilities

Version: 2.0

A Web and Mobile based Rapid Application Development platform

- AppSavy® is a Rapid Application Development platform
- Platform designed for Government Agencies and Enterprises
- AppSavy® is a low code/No code platform that delivers solutions in weeks, not years.
- It enables productivity, cost-efficiency and speed

Key benefits

- Rapid Application development platform, No coding required
- Next Generation software technology
- > Tailor made applications, 100% cloud based and highly secured
- Build Apps with zero coding, Easy to integrate and deploy
- Intuitive Data analytics
- Enhanced productivity and reduction of complexity of a business processes
- Across platform availability Web, Android and iOS.
- Automated backups ensure the integrity and safety of your data.
- Automatic software upgrades and patches. Access to latest technologies always
- Highly Scalable and Customizable.

Key Tools

Push Notifications

MEDIA

Auto recorded Audio Files

FLEXIBLE FORM BUILDING

Numerous element types

Capture Photos

Drag & Drop

OFFLINE

Offline data saving

GPS Mapping GPS Tracking

JOB ASSIGNMENT

Job Calendars Job Scheduling

Cloud Based Admin Access

- 128 bit Data Encryption
- SSL & HTTPS

POWERFUL DATA TOOLS

- Configurable reports
- Auto Email

Workflow and TPI

- Configurable workflows
- Standard TPI integration

WE HANDLE TECH

Zero Tech know-how required High Availability & Reliability

SCALABLE

Handle Large data sets

Handle Large user base

Branding

- Setup Logos, colour themes
- Custom Background Images

VEHICLE TRACKING

- Geofencing
- Rule based exceptions

IOT

Sensors Meters

RFID & BARCODE

- Fixed and Mobile Devices
- Barcode, QR code, UHF &

DOCUMENT MANAGEMENT

- Scanning, Indexing
- Mobile and Web upload, download

ENTERPRISE READY

- Single Sign-on Multiple projects

Call recording, forwarding

SCHEDULER

- User defined Jobs
- Integrated email, SMS and data processing

TASK

- Prioritize To-Dos
- Delegate tasks

Cloud IVRS

Energy Meter Download

Direct energy data download

Ready Integration with billing systems

Key Components:

Form builder	Menu and forms	
	Drag and drop controls	
	Optional separate UI for mobile	
	Option to specify web only forms	
	Option to specify mobile only forms	
	Forms configurations like mandatory location capturing	
Workflow designer	Conditional workflow	
	AND/OR/XOR conditions	
	Multiple entry points	
	Notification integration	
	Task integration	
	Hierarchical or user based	
Version control	Multiple versions	
	Development version	
	Testing version	
	Production version	
	Option to roll back version	

Custom report builder Define the format of the reports Define the placement of data and controls Attach multiple data source Query builder Crosstab reports Drill down reports Roles and right based reports Standard time and date based filters Integrations Rest API based integration SOAP based integration SOAP based integration Drill down Panning Various types of charts Bar chart Column chart Column chart Button chart Button chart Different layers of Maps Available geometry Marker/point PolyLine PolyLine PolyLine PolyLine Drill down maps Events on map Location capture control Notification Manager Notification Document and file Management Management Multiple projects in single app Enforce app upgrade Enable/disable projects OTP and multifactor authentication Over the Air roll out of new versions Automated database creation and management

		OTP and multifactor authentication
Automated database creation and management		Over the Air roll out of new versions
		Automated database creation and management

	Logo and colors management	
Identity and Access	LDAP integration	
Management	Create/update/delete user	
	Define roles and rights	
	Block user	
	Extensive logs for every activity	
	Standard password recovery mechanism	
	PIN based login for selective apps	
	Multilevel hierarchy management	
Security	Sensitive data encryption	
	128 bit encryption	
	Secured communication over HTTPS/SSL	
Offline support	Native mobile apps	
	Offline Master and transactional data	
	Offline validations	
	Offline native database operations	

Supported hardware, software and platforms

Web Browsers supported	Chrome, Firefox, Safari
Android	Version 4.4+
iPhone	iPhone 5+ (minimum iOS version-9.0)
	Android: Java
	iOS: ObjectiveC
	Web front end: HTML5, javascript, jQuerry, Angular
Technology	Backend: .net, c#
Database support	MS SQL, Oracle
Servers supported	Windows Server
Minimum server OS version	Windows Server 2012
Horizontal scaling	Yes
Vertical scaling	Yes
	On-premise
	Private cloud
Deployment	Public cloud
Application server	IIS
Type of Apps	Native mobile apps
